

**Fatima Prophecy** (Portugal, 1917) source: Ray Stanford, Fatima Prophecy, Ballantine, NY 1987

In the town of Fatima in Portugal three children saw visions of Mother Mary and received predictions of events, including the shooting of Pope John-Paul II. On October 13 1917 a crowd of 50,000 to 80,000 witnessed a vision of the sun spinning and streaming energies and that approached Earth with great heat. Fearing the end of the world, the crowd prayed for redemption and the sun then retreated. Having been previously soaked with rain, the people and the ground were now dry from the heat. Later, two of the children died and one survived.

In his book, Ray Stanford's spiritual source said that this represented what could happen and that it depended on human choice. It was a reprise of a past cosmic/solar event that caused Earth to be showered with radiation and particles from the sun, causing mutation and accelerated evolution. The event was associated with Venus (ruling the Heart centre). Earth is now about to go through a great transformation as a re-manifestation of this type of event but at a higher level. Our solar system is approaching an area of cosmic rays and energies that the sun/Earth will respond to (best with love and discernment). The energies and particles will energise the sun and planets, impacting Earth's ionosphere and atmosphere severely unless averted. People must change their consciousness in order to avoid deaths and suffering and to evolve smoothly. Otherwise the incoming dust, hydrogen and other isotopes will cause chemical reactions, noxious gasses, ozone poison, and explosions due to the extra hydrogen and oxygen combining via electrical discharges. Survivors will be helped by Masters, ETs and angels. People will have genetic changes and will begin a new root race. The three children represented the 3 thirds of humanity. One third saw but did not understand, one third saw and understood but did nothing, and the last third saw, understood and took the right action. The first two thirds were symbolised by the two children who died, as the two thirds of the world population who would probably perish. The remaining third are those survivors on Earth who can benefit from such a catastrophe. We should live lives of divine love and purity in order to survive and expand into the new life. There is hope.

A prophetic summary of these potential events is given by his Source at pages 164-165 as follows. He said that the one to two thirds of humanity could die depending on their true expression of Love:

“This miracle shall be a sign of the promise of the regeneration and hope of the world if men, averting evil ways, selfishness, and materiality *turn truly to Love, or God*. But if the warning and then the miracle are not heeded, the angelic forces and those from outside the Earth will not modify the cosmic activity which will cause the solar exchanges in the extreme; and the Earth will suffer three days – in a sense, chastisement, but it is karmic. However, even that will cause, as the burning of the fire out of which the phoenix rises, an eventual refinement of the race of man.

If the consciousness of man changes, through love and devotion, then, as the hearts of men turn to God, so will the cosmic conditions change, through the activity of the angelic realm and those physically from outside the Earth; and the “chastisement” will be averted or lessened. The sun will react in a different way; the radiation will be subtle and gradual, and the mutations more subtle, but just as positive in their nature. A new consciousness will rise up among the children of men living in an age of peace.”
