

Meditation for the World #1

We call upon our brothers and sisters of light
To unlock the gates of our being
And allow the light of Christ in
That we may be set free
To walk with God in unity and abundance
Of all life.

We call upon the powers of good
To transform the world
To uplift all humanity
And to enlighten the lives of all other beings
That we may live in divine harmony
At peace, in love, and in light.

Let the divine Will be done
And may I be a willing tool for its completion.
We call now for the divine fire to descend on us
Alive in its Godliness
That we may be consumed in its beauty and power
To emerge as saints radiant with love
Radiant with God light
Radiant with healing power for the nations
And for all that is.

And we dedicate our lives to the fire of God
In all
Of all
For all

For ever.
