

Revelation

Gordon Herbert

So you want to know how to create positive global change? So be it.

“We create with our hearts, with clear vision, clear alignment, and pure love. We are all one, so we need to express that in all we do. We cannot leave it till Sunday. It all affects all, what we give out affects all, and affects us in return. So how does this affect global change? It affects it directly, by entering into the very minds and hearts of others. The affect is “psychic”, for we are intimately connected to all others. And by the way, this means we are connected psychically with other civilisations in other parts of the universe and in other dimensions. They also are affected and consequently interact with you/us. If you think, you will see that this can be positive or negative, as what we think (as a people) comes upon us. We attract what we put out, and there are energies from higher dimensions (already happening and) ready to interact with you.

“So what to do? You already have the techniques of visualisation, invocation, meditation and prayer, so use them. There is no mystery in this. They are simple, effective and practical methods to achieve peace and eventual plenty. Use the methods regularly for they are your pathway to that fine development that you yearn for. They will transform you and herald a new civilisation, for you must change your ways before you can “ascend” in spirit to a new vista of your life. The light must start with you. Then it will spread, like Buddha’s candles¹, as your light touches all those around you and out into the world. The more who do this, the sooner the world will transform into a civilisation of light, of comprehension of the wider living entities that are all around us, and of true beauty within.

“Be not afraid, for life is one, it evolves and must change, for the better in God’s loving purpose. Do not be concerned about this for that purpose is in your heart and expresses in the very best of all things that you can conceive. Doing your best is what matters to God and to all divine and concerned beings around you. There is much to do and everyone can take their part, can do that which they love most illumined in the divine presence. Make sure you attune to it, free of ego and illusion. Ask for that protection if you are unsure, for many is the error made on the path. This is wisdom in learning, you do not have to be perfect to do God’s work. The Christ lives in all of you. Allow that divine Life to emerge in your consciousness and express in your joy of living. Do not be concerned about setbacks or apparent troubles of the world. All is in place and working out according to Law. Just do your work in the clear knowledge that you are with God, with Love, with All for the benefit and joy of All. You are blessed to be able to know that you are doing this work, for that puts you in a beautiful position of enlightened action, and closeness to your divine brothers.

“Be at peace, our blessings grow in beauty within and around you.

Adonai

God is with you.”

¹ “Thousands of candles can be lighted from a single candle, and the life of the candle will not be shortened. Happiness never decreases by being shared.” - Buddha

This message came to me in response to a request for an article on positive global change. It reveals that our own thoughts and actions create the world we live in and that we wish to create. This world is revealed, and expresses, from the depths of our own being, and it evolves as we evolve. Any change begins with us, and we can work at any or all levels of action.

The message emphasises the power of “spiritual” techniques and self-transformation, as these are the bedrock of effectiveness. It emphasises the need to live and work to our highest ideals, in our invocations and in our daily round. There are millions around the world who are seeking how to make a positive change. We need to recognise that we are a part of this vast movement, contributing our psychic light to raise its power for good in the world. The darkness of the lower nature can be transformed in the light. This will bring conflict, and this will bring clarification of motives and values. Choice will become clearer. We can all choose to do that which we believe will contribute to the greater good.

What is different now when compared to previous times is that we need to focus on global benefit, for the time and need for global integration is now. It is important not to send negative energy to what we may think of as the forces of darkness in our world. Light dissipates darkness. Overcome evil with good. Use the techniques to visualise and invoke our world of harmony, love and coherence of all positive activities. Have your vision, and work towards it. The divine wisdom is ever present, and the enlightened intermediaries are ever willing to work with us to assist our upliftment. If we know this, and take part in the ongoing teamwork to raise Earth into a more creative frequency, then we will be truly doing our best to bring about positive global change. It can take tens of minutes a day, or longer according to your wishes. All is valuable, and all contributes to the living light of our world.

Some may wish to focus on “more practical” activities, but the spiritual or wisdom knowledge does not preclude these, however we may think of them. In fact they work very well together, as the inner must always be expressed in the outer. Without this harmony between the “spiritual” and the “practical”, they lose effectiveness. We do what we can in the light of our understanding. The spiritual techniques simply open the greater light to flood us with wisdom as we grow into our essential Selves. Ultimately, the power and wisdom for positive change comes from our one divinity within, that is also without and One in All. Therefore we should seek it and express it, for it hungers to teach us how to bring light into the world, and join in the joy of divine creation. Let us transform now, in faith and in love, for victory awaits us.
