

The Time is Now

Revelations for today from the Master Djwhal Khul and Ken Carey

In the year 1425 the Hierarchy of Masters (the White Brotherhood) met to create a plan to enhance the development of humanity. Their ultimate aim is to externalise among us in order to further integrate humanity into the overall plans and purpose of the Planetary Logos. A timeline of their influences to the year 2025 is annexed below. As a result of these influences and humanity's response to them, Djwhal Khul (DK) says that now is the most amazing period of human history as:

- We are entering Aquarius in both the greater and lesser zodiacs,
- The Planetary Logos is undergoing the 4th initiation, absorbing extra-planetary energies for the benefit of the planet,
- The quality of light has changed and increased, intensifying to the year 2025 and then becoming stable, and the Buddhic energies are increasing rapidly,
- The trinity of Shamballa¹, Hierarchy and humanity is in unimpeded alignment for the first time in human history,
- There is a great awakening and spiritual re-orientation of humanity now, that was not expected to occur for another 2,300 years,
- There is a great expansion of Hierarchical numbers with a great influx of disciples and initiates, and
- All has been made possible by humanity absorbing spiritual energies, seizing the opportunity and wanting to create a new and better world.

The evolution and development of humanity has always been helped by the Hierarchy and beings from beyond our solar system. Humanity is the middle kingdom of seven on Earth, vital to its overall development. The Masters, who are in the higher kingdoms, incarnated from Venus during the Lemurian Age 18 million years ago, and during the Atlantean age they included advanced humans in their ranks. They meet together every 50 years in the 25th and 75th year of each century, and at other times as needed, to decide how best to help humanity in its long journey towards a more enlightened and integrated life on Earth. It is these high beings from the next, the 5th Kingdom, that send out ideas as intuitions that inspire humanity to better things.

Three Phases

We are currently in the first, forerunner phase (of three) of the externalisation of the Hierarchy of Masters. This is necessarily one of some destruction of the old and inhibiting forms of religion, economics and politics, and the visioning of deep truths and improved ways of living. Much work is being done in cutting through glamour and illusion, and educating the public about the esoteric world of meaning, of the Masters and the Divine Plan. Meditation and inner guidance is essential. In this first phase, which is to end in the year 2025, scattered initiates of the 3rd degree and disciples are articulating the new ideas and values and helping to offset the reactionaries amongst us. Changes since the end of WWII indicate the rapid growth of a new world culture and global vision.

In the second phase, initiates of the 4th degree will begin to externalise and help build the new world. They will assume office in all walks of life through public recognition of their qualities, not because they are members of the Hierarchy. This will lead to new methods in politics, religion, economics and education.

¹ Shamballa is the at the highest level, the 7th Kingdom, of divine life on Earth. It is the home of the King of Peace, or Lord of the World, Sanat Kumara, and expresses the 1st ray energy of divine Will and Power.

In the third phase the Christ (Bodhisattva) and other high Masters will incarnate and work publically. The mysteries will be restored and the new religion, as spirituality, will be an attitude governing all phases of life and development.

The Forerunners

The group of advanced disciples gathered together in 1916 by the Masters to help manifest their plans has now grown to a very large vanguard of progressive people concerned about the well-being and future of our planet. Research by Dr Paul Ray in the 1990s in North America, Western Europe and Japan found that a third of their adult populations have the remarkable qualities needed for world renovation.² He calls them Cultural Creatives because they are distinguished by having a holistic, integral and creative understanding of our role on our planet. According to DK these progressives need to work on subjective levels with no recognition, consciously spiritual, intellectually inclusive, without any creed and responding to their own souls. They are not bound to an esoteric organisation, but are non-partisan and world citizens. In order to work with the Masters' plan they must have an alignment between soul-mind-brain, be telepathic, have abstract and synthetic thought, and focus on the future. They aim to be helpful to the world, demonstrating universal truths, and helping develop the consciousness of humanity till it understands practical spiritual reality.

This plan of assistance from the Hierarchy, and humanity's eager response, created a climax of spiritual liberation between the years 1965 – 2025. The telepathic and energetic alignments between humanity, Hierarchy and Shamballa are in fluid interplay and are now very active. Consequently there is great spiritual activity and telepathic rapport among progressive humanity. Together with the impact of 2nd and 1st ray energies, this has created three major human characteristics:

- a) Extensive interrelations and communications,
- b) Widespread philanthropy, and
- c) Division into conservative reactionaries and progressives with a vision for a better world.

Glamour, illusion and maya is being destroyed in all walks of life, including education, religion and the economy. Esoteric and occult groups have contributed to the awakening, but have unfortunately become the most glamoured of all world groups. Those started before 1919 will all disappear, though the most sound of their members will become a part of the progressive vanguard. Churches will crash on abused authority, but their enlightened members will become part of the new religion, which will be universal and gnostic. The portrayal of the Masters by the I AM movement was described by DK as a travesty, and their portrayal by the Theosophical Society was also very poor.

Post 2025

The quality of light has changed several times during past ages, producing mutations. It is currently increasing and will eventually make etheric vision possible. DK says that it will intensify till the year 2025 and then will stabilise. The planetary Buddhic energies are increasing, providing us with a choice for initiation. In the year 2025 the Masters will devise a new plan for humanity, integrating the will and purpose of Shamballa. It will be evolutionary and self-revealing for people, whole and complete, yet gradual in its implementation. Later, esoteric schools will emerge to assist human development, including the teaching of meditation, frequency, colour and sound, and of the laws of

the universe. This will require trained minds and emotions, a coordinated personality and intelligence. The keynote will be synthesis, leading to conscious intuition and mental interpretation.

Ken Carey

These messages by DK have their correspondence 50 years later in Ken Carey's book *The Third Millennium*, which is sourced at a divine level.³ He says that our solar system is now entering a new region of space that enhances the capacity of the Creator's awareness to come into complete alignment within us. There was a great transition between the years 1975 – 2000 when a bridge of oneness was created between Creator and creation. Now is the culmination of many Mayan 5125 year cycles, indicating a planetary move into a new galactic field. It is a new season of the universe with many cycles now at their alpha and omega points.

Relevance for Humanity

Collective human consciousness is now entering its final stage of awakening as an organ of consciousness of a single planetary Being. There is a great relevance in the dramatic improvement in human communication and its global network and great educational improvement on inner and outer levels. It is leading to a new evolutionary phase with new rules and creative conditions. The intensified energy field of collective awakening drives out fear-based thought and self-destructiveness. Self-serving, greedy and fear-based people lose personal vitality as the negative energies withdraw. We are awakening to see ourselves as part of one integral organism in our planet. The old orders are turning away from old ways, for their own interests, to new ways in service, education and healing. Conditions now are much improved compared to a century ago. This pace of change has accelerated to the 2nd decade of the 21st century. We are coming to realise that education leads to an understanding of our integral role in global ecology, which in turn will determine our role in creating an enlightened economy.

Carey's History

Ken Carey's source also provides an esoteric history of help from higher beings for humanity's development. He speaks of a wave of inner level education in the 18th century that assisted insight into human awareness and led to the decline of aristocracies. A further wave in 1860 promoted freedom, justice and equality (and would have helped open-minded thinking during the 1875 preparatory stage teaching mentioned by DK). Other waves converged in the late 1940s, leading to a new consciousness with great human receptivity (corresponding to the intermediate stage teaching of DK from 1919 - 1949). It led to communication with people on a large scale, and by the 1970s a new awareness was exploding. By the late 1980s the educational influence was the most powerful ever with growing deep awareness and extensive transformations. Its effects are being seen in the early decades of the 21st century (this period corresponds to DK's revelatory stage of education, 1975-2025) as a rapid change in human civilisation. He says it is a consequence of an energy/information beam linking individual, solar system and galaxy.

Planetary Awakening

Earth is rapidly entering into a new field of awareness of universal Presence. It is awakening within people as a new and greater love and consciousness, more powerful than any previous education waves. Now is the beginning of the time of the descent of the Masters and Creator Beings, the "era of the Gods return". It is the Age of Planetary Awakening, with a "due date of birth" in the 2nd decade of the 21st century, though the actual time of birth can vary. It will then be a unified field of awareness of greater power than the Earth has ever seen. Its effects depend on our choices now, but Earth changes will happen.

³ Ken Carey, *The Third Millennium*, HarperCollins, NY 1991, p.23-4.

The awakening will bring in a new age of religion in which our spiritual identity will be within our local human being, and/or in the field of Eternal Being that births our local identity. We have now the opportunity to catch this powerful wave, as it lasts only a few years. All will experience it, but we can choose now to go with it and to even out the great influx of energy that will stimulate the creative and destructive alike. **Now is the time** when the choosing of eternal life is greatest, and we can let go of the past. This cohesion of collective consciousness is creating more telepathic awareness and spiritual aspiration, new perceptions and understanding, and a new love in God.

Human Destiny

The world is now as a seasoned garden on the eve of harvest. A large percentage of people are choosing to enter the stream of consciousness that is the river of God life. We are choosing between the realms of subconscious fear and conscious love. We are participants, not observers.

There are two stages of creation for humanity:

- a) The first stage creation is that of the universe and life on Earth to date,
- b) The second stage requires voluntary human participation to complete the planetary organism, though this has been delayed by our poor stewardship of Earth ecology.

We are the prototype of a new and universal species spanning the gulf between the visible and the invisible that will bring new worlds into form. As Ken Carey's source says⁴:

“Time and space do not revolve around humankind, but our dreams do, our plans do. We are depending on you to bring shape and texture to the order that has rested implicit within all Creation since before the first starry nebulae illumined dimensional space. We are inviting you to help us bring into physical formation the vision that inspires the universe....Through you a new and unprecedented cycle of creation will occur.”

Science Notes

Modern scientific research has validated the existence of the vanguard of progressives in our population that are doing all they can to create a better, sustainable and unified world of freedom.

The space probes at the boundary of our solar system are finding vast magnetic fields that indicate the presence of electric flows within ionic plasma clouds, and that we are now moving into such clouds. They are part of the organic energy structure of our galaxy influencing Earth.

Earth's magnetic field is weakening, from a previous estimate of 5% per century to a recent estimate of 5% per decade. The magnetosphere protects us from cosmic rays from the Sun, the stars and the galaxy, so its weakening lets more of these energetic rays into Earth.

Warnings by both DK and Ken Carey of major Earth disruptions in the process of transference to a new world have a correspondence in the Limits To Growth modelling by Graham Turner.⁵ His model of global systems indicates a collapse of these systems in the middle of this century because we have pursued a business-as-usual approach to world problems rather than changing our thinking and behaviour.

Annex: Recent Hierarchical Influences, 1425 – 2025

- 1425** Beginning of the process to externalise the Hierarchy of Masters (White Brotherhood). **3rd ray** begins, 3000 yrs, covers Aquarian age, stimulates intelligence and creative work, has a direct effect on the 5th root race. Renaissance and its humanism starts. Permission given to Masters for inflow of **1st ray** energy to break up old conditions. Requirements for initiation are changed to promote alignment between mind, soul, spiritual triad and monad. Use of telepathy and impression increased. Initiates of 3rd degree incarnate, aim to establish a new culture of civilisation (esp. transference from Solar Plexus to Heart).
- 1500** Masters seek ways to hasten individuals' inner integration and inner light and to develop their knowledge of the Divine Plan. A time limit looms because of various cycles converging at the commencement of the Aquarian Age and the need to use those energies then.
- 1575** **Ray 2** starts with many 2nd ray egos incarnating and manifesting the Christ impulse
- 1625** **Ray 6** begins to decline, reducing Solar Plexus devotional influences. There is a 500 yr crossover period between the Age of Pisces and the Age of Aquarius (its influence totally ends at yr 2125)
- 1675** **Ray 7** starts (2,500 yrs), the ray of the Aquarian Age, uniting spirit and matter in consciousness and behaviour
- 1775** **Ray 5** starts, stimulating modern rational science. Beginning of the industrial revolution. The USA declaration of independence in 1776. The **1st ray** destructive influence that was brought in by the Hierarchy in 1425 to break up rigid social patterns inhibiting progress is almost over, and its creative aspect now begins.
- 1825** Economic adjustments begin (continuing to yr 2000) as a result of the influence of ray 2 egos. Masters agree to apply **Ray 1** energy from Shamballa directly to humanity.
- 1875** The beginning of enhanced Hierarchical teaching to disciples in the West, in three major stages:
 a) Preparatory stage, 1875 – 1890 (15yrs) Blavatsky, and the Theosophical Society starts,
 b) Intermediate stage, 1919 – 1949 (30yrs) Djwhal Khul and AA Bailey, 24 books,
 c) Revelatory stage, **1975 – 2025** (50yrs) worldwide via electronic media (esp. after yr 2000) Initiation as a group process starts.
- 1900** Hierarchy formulates a contemporary Plan for humanity, further detailed in 1925
- 1916** The Masters gather a group of advanced disciples to help manifest the Plan, as forerunners to the externalisation of the Hierarchy (now the Cultural Creatives?)
- 1975** Masters apply **Ray 1** energy from Shamballa directly to humanity, and also in year **2000**.
- 2025** The Masters will create a new phase of the Divine Plan, of which the Plan for humanity is a part. The new phase will focus on the will and purpose of the Planetary Logos and will necessarily be wholistic, evolutionary and self-revealing for humanity. It will aim for a subjective synthesis in humanity, with telepathic interplay with both the higher kingdoms (of the Masters and Logos) and lower kingdoms of nature, leading to eventual omnipresence and omniscience. We will understand our cooperation with divine purpose. A time will be set for the Masters to externalise. The Mysteries will eventually be restored. This Plan will be a major influence upon the Aquarian Age.
Ray 4 of harmony through conflict begins.
